Public Benefit	Notes
Ensuring Safety and Security	This project would benefit the public by potentially reducing the incidence of crashes along this roadway segment, corridor, and/or intersection.
Maximizing the value of Georgia's Assets	This project could potentially maximize the full utility of an existing transportation facility(s). In some cases, bypasses will be necessary. Example benefits could be: mitigating congestion (e.g. operational improvements) and optimizing capital asset management (e.g. resurfacing, rehabilitation). The impacts would apply to this roadway segment, corridor, and/or intersection.

Additional Benefits	This project would benefit the traveling public by making it much safer for vehicular, pedestrian, bicycle and truck traffic. These improvements will provide areas lagging in growth with greater opportunities to attract industry, business and jobs as by facilitating rail traffic from Inland Port to Cordele. Additional benefits would potentially decrease the frequency and severity of traffic accidents.
